

Custom Design Homework

Create a “Dream” home notebook. We will help you with that by supplying a “Design Outline Questionnaire” on the pages below. Photos, magazine clippings and filling out the questionnaire will allow you to create sequential process of what you like and don’t like.

1. Exterior features – veneers; brick, stone, cast stone, stucco
2. Kitchen features – Appliances, countertops, tiles, cabinets, flooring
3. Master Suite – Size of furniture, tub, shower, sauna, fireplaces
4. Specialty features – fireplaces, media rooms, exercise rooms, craft rooms, loggias, trim details, beams, fireplace mantels
5. Colors – textures, finishes, fabrics
6. Things that you specifically do not like
7. Written notes – random thoughts as they occur to you

This is the time to write down all of those stories that you have collected (good and bad) about the process of home building and home builders in general. You can discuss all of these things during the design process with us. I have found that these discussions are great for creating a baseline of understanding.

We will help you create this design notebook for your new custom home. It is part of our services that we provide.
